DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 18, drawn to an organic electronic device, classified in class 257, subclass 98.
 - II. Claims 21 and 22, drawn to a chemical compound, classified, *inter alia*, in class 546, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as use in electroluminescent paint or oxygen-pressure sensitive paint. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 2813

Should Applicant elect the invention of Group I, then **one** from **each** of the following Groups A through C must be elected to give a single species combination:

A. Formula of compound

A-1. $\text{IrL}^a\text{L}^b\text{L}^c$ (the proviso of claim 1 wherein $y+z=0$)

A-2. $\text{IrL}^a\text{L}^b\text{L}'_1\text{L}''_1$ (the proviso of claim 1 wherein $x=0$, $y=1$ and $z=1$)

A-3. $\text{IrL}^a\text{L}^b\text{L}'_2$ (the proviso of claim 1 wherein $x=z=0$ and $y=2$)

B. Identity of A

B-1. carbon

B-2. nitrogen

C. Ring structure of ligand

C-1. none of R1-R4 or R5-R8 form rings

C-2. R1 and R2 form a ring structure (only valid when B-1 is elected)

C-3. R2 and R3 form a ring structure

C-4. R3 and R4 form a ring structure

C-5. (R1 and R2) and (R3 and R4) each form a ring structure (only valid when B-1 is elected)

C-6. R5 and R6 form a ring structure

C-7. R6 and R7 form a ring structure

C-8. R7 and R8 form a ring structure

C-9. (R5 and R6) and (R7 and R8) each form a ring structure

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2813

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erik Kielin whose telephone number is 571-272-1693.

The examiner can normally be reached on 9:00 - 19:30.

Art Unit: 2813

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead, Jr. can be reached on 571-272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
